To be continue...

Project issues

There is currently no problem with the project, and everyone has made corresponding contributions in their own role.

Documentation overview

Hifi Design

Project Requirement

Lofi Design

Project changes

Removed stakeholders and waiting for the response from uparking service team

Status description

 Green

Right on schedule

Team reflection

There is still room for improvement in task allocation and time adjustment.

Next up

1. Design EZparking software architecture
2. Start of MVP1
 - Front end: Start collecting JavaScript canvas related documents and try integrating map api with frontend application – Yilin, Zhuo
 - Back end: Start collecting map api documentation and do some minor testing based on the documentation – Kecheng, Ziwen
