VLOG 1

Kecheng Yu, Yilin Ren, Ziwen Tan, Zhuo Chen

Background

- Driving is one of the preferred modes of transportation for modern people.
- Finding a parking space is a problem that every driver has to face.
- Drivers need to spend a lot of time to find a suitable parking space, if there is no software to help users find a parking space.

Reason

- Hard to find a parking spot
- Late for class because of a far away parking
- Arrange time reasonably

Impact

- No more parking problems causing being late for class
- No more wasting time driving around the campus looking for a parking spot
- Sleep more study more

Who

Students, Instructor and visitors

- User obsession.
- Seek input from user at every design stage.
- Make sure we on the right track.

What

- Technology constraints
- Time conflicts
- Resources constraints (Time and Budget)
